01/16 – Dragon Creativity Ltd. New Milton. Software maintenance, website development, packing & posting orders, product photography, digitising designs.

4/19 – Personal assistant to disabled person. Assisting as needed, supporting on trips out.

Skills / Qualities & Achievements:

I have experience and skills in C#. C++, Python, Unity, Java, JavaScript, Web design, CSS, Game logic and User interaction, I also have knowledge and experience of setting up and maintaining games servers and setting up small game streaming for friends. I have experience of games testing and analysis. I have significant experience in hardware and software maintenance, especially of dedicated gaming computers.

I am a Generalist both in programming and the games genres I enjoy.

I like to work independently although I am able to work in a team when needed.

I am very determined and focused, persevering with any challenge I am given until I solve it, whatever the obstacles that occur. I am good at meeting deadlines and targets as well as looking at ways around problems that present themselves.

Personal Statement:

I am a very loyal, honest and committed person. I believe in doing my best at all times. I am a keen learner and am always keen to find out more about what I am doing.

I am very interested in all aspects of computing, especially games programming and am a very keen gamer, running servers for some of the games I play. I play a variety of games but particularly RPG's and MMO's,

I love all sorts of music but am especially keen on rock and heavy metal genres. I have dabbled in playing the drums and also play the electric guitar which I really enjoy. I am also interested in photography, photographing especially animals.

In my spare time I volunteer at a local equine assisted learning group, where I work with horses and also help them with the younger children. I also enjoy taking part in archery. I also enjoy watching films and anime.
